### POTENTIAL IMPACT OF THE COVID-19 PANDEMIC

For now, we assume that 2021 IEEE IUS will be held according to the original plan in Xi'an where COVID-19 is well controlled. However, according to the current global COVID-19 pandemic and international traffic blockade, we are preparing for alternatives. Therefore, the committee will plan for a full virtual conference as a backup, depending on the international health and traffic situations in 2021. The hybrid format will be considered.

**The annual IEEE IUS will be held at the Qujiang International Convention Center (QICC), from September 12-15, 2021**

The abstracts should be submitted in electronic form according to the specific information posted on the conference web page. Each abstract will receive careful review and evaluation by the Symposium Technical Program Committee. Evaluation criteria will include originality of the work, contribution to the state-of-the-art, and overall interest to the ultrasonics community. Papers are solicited for this conference describing original work in the field of ultrasonics from the following subject classifications and their cross-subjects:

- » Group 1: Medical Ultrasonics
- » Group 2: Sensors, NDE & Industrial Applications
- » Group 3: Physical Acoustics
- » Group 4: Microacoustics – SAW, FBAR & MEMS
- » Group 5: Transducers & Transducer Materials

### STUDENT TRAVEL SUPPORT

Limited funds are available to support IEEE UFFC student member attendees at the 2021 symposium. Awards will be given on a competitive basis. Please see the conference website for details.

### STUDENT PAPER COMPETITION

Students submitting abstracts are invited to participate in a student paper competition. To participate, the student must be the lead author and present his/her paper. Further information will be posted on the conference website.

### EXPLORING XI'AN

We encourage all delegates to explore Xi'an together with family, friends and colleagues before or after IEEE IUS 2021. Xi'an is located in the central part of China and this city has more than 3,100 years of history, as the capital of 13 dynasties, including the Zhou, Qin, Han and Tang. Many places of interest and historic sites coexist harmoniously with modern architecture, which will bring you a novel experience.
